RE: WT Docket No. 02-55

Dear Chairman Powell:

I'm presenting to you further affirmation of the wide support of the Consensus Plan from the public safety community. Accompanying this letter is a petition with more than 500 supporting signatures representing chiefs of police and other law enforcement professionals from around the country.

The signatures represent the strength of public safety support for the Consensus Plan to realign the spectrum and alleviate interference in the 800 MHz band – a plan currently under consideration by the Commission. Recently, the strength of this support has been called into question. We organized this petition to highlight that the organizational support for the Consensus Plan – support from the International Association of Chiefs of Police and the Major Cities Chiefs Association – is squarely in line with the opinions and needs of the members of these organizations. Rank and file members join the IACP and MCC to make sure that issues important to law enforcement are identified and addressed. This petition demonstrates that the IACP and MCC leadership on the issue of 800 MHz interference is clearly supported by the membership.

I can speak firsthand to the enthusiasm and conviction among IACP and MCC members following notification of this petition. They recognize, like so many of their public safety colleagues, that interference is a dangerous problem in need of a comprehensive, proactive and fully-funded solution – a solution offered only by the Consensus Plan.

I hope that as you and the members of the Commission consider the options for dealing with 800 MHz interference you will keep in mind the strength of support from public safety for the Consensus Plan. The lives of law enforcement officers and the communities we proudly protect are too important to do otherwise.

Respectfully,

Harlin R. McEwen

RE: Support for the 800 MHz “Consensus Plan” to solve Public Safety interference

Dear Chairman Powell:

We, the undersigned, gathered to attend the Annual Conference of the International Association of Chiefs of Police (IACP) and/or the Annual Meeting of the Major Cities Chiefs Association (MCC) in Philadelphia, Pennsylvania, from October 19-24, 2003, are extremely concerned with interference in the 800MHz band of the radio spectrum and believe the Consensus Plan is the best solution. It is estimated that public safety agencies will experience interference at more than 350 locations this year – the highest single-year total to date. The trend is alarming and foreshadows further interruption of mission critical communications during everyday emergencies and future catastrophic events.

We believe the Consensus Plan proposal for the realignment of the spectrum is the best solution to the current situation; it is supported by all of the major public safety organizations. We advocate for the Consensus Plan because it will:

- ✓ remedy interference to public safety communications systems and private wireless systems operating at 800 MHz
- ✓ minimize disruption to existing licensees and services - 70 percent of existing private wireless incumbents would achieve benefits of the Consensus Plan without any system modifications whatsoever
- ✓ ensure public safety agencies would have access to additional spectrum to support their mission critical communications
- ✓ require no federal, state or local funding to implement.

As time passes, our risks from this problem continue to grow. This is a critical issue for the public safety community and our nation. Therefore, we strongly urge you to consider the safety and effectiveness of public safety personnel as your top priority.

Thank you in advance for your consideration.

Respectfully,
